+1-517-515-2575

Objective: CSE Ph.D. candidate looking for challenging **Full-time** opportunity (Research Scientist / Biometric Researcher / Machine Learning Engineer) starting **May 2020**.

Education

		CGPA
Michigan State University (2015-Present)	PhD in Computer Science & Engineering • Advisor: Prof. Anil K. Jain	4.0 / 4.0
IIIT-Delhi (2009-2013)	B. Tech. (Hons.) in Computer Science & Engineering • Graduated with 2nd Rank in IIIT-D	9.42 / 10.0

Work Experience

PRIP Lab, MSU (Aug'15 - Present)
Graduate Research Assistant - Pattern Recognition and Image Processing Lab
Advisor: Prof. Anil K. Jain
- Fingerprint Presentation Attack Detection
- Latent fingerprint value determination: crowd-based learning

NEC Labs, Princeton, NJ (Jun'18 - Aug'18)
Research Intern - Integrated Systems Group
Advisor: Dr. Yi Yang, Dr. Srimat Chakradhar
- Know Your Ink: Automated Tattoo Detection and Recognition

IBM Research, New Delhi (Feb'14 – Aug'15)
Software Engineer - Information Management & Analytics Group
- Detecting and ranking law & safety disrupting events using social media mining
- Automating Name Normalization based on text matching

IIIT Delhi (Dec'13 - Feb'14)
Research Assistant - Image Analysis & Biometrics Lab
Advisor: Dr. Mayank Vatsa and Dr. Richa Singh
- Matching composite sketches to face images

INRIA, Nancy, France (May'12 - Nov'12)
Software Engineer Intern - MADYNES Team
Advisor: Dr. Isabelle Chrisment
- Designed a P2P to I2P multi-bridge network and defined network protocol

Software Skills

Programming Languages	Python, C++, Java, C, C#
Tools & Technologies	TensorFlow, CUDA, PyQT5, SQL, Android and Web App Dev., HTML5/CSS3, Node.js, Git, Google App Engine, PyCharm, MATLAB, Visual Studio, Latex
Environment	Mac, Linux, Windows

Graduate Courses Taken at MSU

Machine Learning, Data Mining, Pattern Recognition, Computer Vision, Natural Language Processing, Design and Theory of Algorithms, Theory of Prob. and Stats. - I & II, Parallel Computing, Advanced Computer Graphics

Selected Projects

Fingerprint Presentation Attack Detection, PRIP Lab, MSU (Mar'17 – Present) [video]

- Utilized fingerprint domain knowledge and deep learning methods to design a robust fingerprint PA detector
- Improved generalization and interpretability of CNN models by investigating material characteristics and 3D t-SNE
- Developed an android application for real-time fingerprint spoof detection on a commodity smartphone (< 100ms)

Learning Latent Fingerprint Value Determination, PRIP Lab, MSU (Aug'15 – December'16) [media]

- Developed a crowdsourcing tool, Fingerprint*Mash*, to collect latent value responses from fingerprint experts
- Utilized matrix completion and multidimensional scaling to identify the underlying bases of value determination
- Learned an objective and automatic latent value predictor in terms of latent features that can rank a given set of latent fingerprints saving crucial time of fingerprint experts

KnowYour*Ink*: Automated Tattoo Detection and Recognition, NEC Labs America (June'18 – Aug'18)

- R-CNN based tattoo detection trained using Resnet-50 architecture on 20,000+ annotated tattoo images in the wild
- Feature extraction performed using inception-resnet-v2 architecture matched using cosine distance
